Installation and service from a single source

# Decorative Protection for Shops

Beyond opening hours, many shopping centres and shop windows are hidden behind unattractive doors, which often provide insufficient security.

The Mobile Partition Wall enables potential customers to see your merchandise at any time, enhancing the appearance of your business, while steel reinforced aluminium profiles protect against theft and extreme force.

Upon opening, the elements of the partition wall park and store in a space-saving manner in the cassette, e. g. above a suspended ceiling, ensuring a tidy appearance with full accessibility.

The Mobile Partition Wall is also suitable for more unusual constructions, for example use as a counter enclosure.

As soon as the wall is closed, a lock in the drive unit prevents the wall being able to be lifted.

The Partition Wall has no functional gaps between Partition Wall elements, preventing foreign objects and dirt reaching the interior.

## Aesthetically Pleasing Security **for Banks**

Security is imperative in the banking business. During business hours the self-service area and the service centre are joined, however, beyond business hours the two areas must be securely separated from each other.

The electrically operated Partition Wall for banks provides excellent protection when closed, without curtailing the area available for customer interaction.

Informational sign with text and H&M logo at the bottom.

# Attractive Versatility

We can offer unobstructed access to shops with wide openings through utilising a sideward moveable track.

Each Butzbach Partition Wall is customized to the customer's specifications. Three different design variants are available: an all glass version, a version with horizontal profiles and a version with both vertical and horizontal profiles.

By colour coating the aluminium profiles or by adding individual design ornaments, the Butzbach Partition Wall can be optimally adapted to your corporate identity and the installation location.
